

## BK-Medent Double Pin System

# No compromises.

1,000 double pins, plastic sleeves  
and end caps

**\$95.00** USD (#71600)

1,000 double pins, metal sleeves  
and end caps

**\$115.00** USD (#71605)

### Accurate fit, permanently fixed.

The standard size head of our pins make it possible to achieve the right fit, with any popular pin drill. The special grooves assure permanently fixed pins, once glued in place.

### Consistent sleeve positioning.

Precision manufacturing ensures that the die is returned to the same position within the sleeve, every time it is inserted. Unlike cheaply manufactured pins, our pins have a precise profile that does not have "flash." This avoids an improper fit in the sleeve.

### Protected completely.

With our system, the sleeves cover the entire pin, removing the chance of inaccuracies caused by abrasion to the stone. Low quality pins just can't compare.

### Removable caps add stability.

Rubber end caps fit tightly against the sleeve to offer complete coverage of the pin once it is assembled. This provides added stability while pouring the base. Each end cap also has a small slit so it can be easily removed from the poured model with a simple twist from a flat instrument.
